

Reminder: Saturday, May 3rd is the date to begin using new shipping labels

As previously announced, we're excited that Eurofins is continuing to expand its U.S. laboratory presence by adding clinical centers of excellence. Boston Heart will partner with [Ascend Clinical](https://aclab.com) (<https://aclab.com>) to transition our clinical chemistry and hematology testing to Ascend Clinical's state-of-the-art automated analyzers.

Important dates to remember:

- You should have received updated shipping labels and instructions. **Please do not use these labels until Saturday, May 3rd, 2025. As of May 3rd all venous shipments must be labeled with the new return shipping labels** to ensure samples are routed to Sunnyvale, CA. Learn More: [Shipping Labels](#)
- Also beginning Saturday, May 3rd, an updated tube will be required to order fibrinogen. To update your existing kits, please follow the instructions provided here: [Fibrinogen Tubes](#)

Any new venous kit orders now contain the appropriate shipping labels, updated tubes, and collection instructions. Existing collection kits can still be used apart from fibrinogen noted above. Learn more: [Sample Collection Instructions](#)

If you have questions about these testing changes or do not receive your updated supplies, please contact customer care [here](#) or call 877.425.1252.
